

Who are Ecofurb?

Who are Ecofurb and what do they do?

Ecofurb are on a mission to provide the most cost-effective route towards Net Zero for the UK's homes. They help homeowners understand where their homes are wasting energy and what they can do about it. They offer a whole house plan called the 'Ecofurb Plan'.

The Ecofurb Plan includes an assessment by a qualified expert. They'll review your energy use and how your home's built to recommend retrofit options. That could include insulation, solar panels and much more. The plan will be unique to your home. It'll identify energy-saving measures, taking into account the cost, the benefits and how suitable they are for your home. That means you can easily see what options will have the most benefit for you.

Why has Santander partnered with Ecofurb?

We've been working together since April 2023 under the government's Greener Homes Finance Accelerator. That's an initiative to help homeowners make their homes more energy efficient.

Santander are supporting this bid lead by Ecofurb to offer a one-stop-shop retrofit service. They aim to provide national coverage for the most common measures.

Ecofurb are passionate about acting on the climate emergency. They also want to make homes healthier to live in. They can help all the way through your retrofit - from planning to finding an installer, through to checking the work. And they have 20 years' experience giving quality, independent advice.

Ready to find out how Ecofurb can help you?

If you're a homeowner, you can access Ecofurb's online advice for free. Tell them about your home and they'll give you a 'shopping list' of options. You can filter the ideas based on your budget, environmental goals and priorities. This allows you to start exploring the most cost-effective path to making your home more energy efficient.
