

Santander UK Group Holdings plc

2018 Additional Capital and Risk Management Disclosures

Introduction

Santander UK Group Holdings plc's Additional Capital and Risk Management Disclosures for the year ended 31 December 2018 should be read in conjunction with our 2018 Annual Report.

Santander UK Group Holdings plc (the 'Company') is the immediate parent company of Santander UK plc. The Company and Santander UK plc operate on the basis of a unified business strategy, albeit the principal business activities of the Santander UK group are currently carried on by the Santander UK plc group. The Company was incorporated on 23 September 2013 and on 10 January 2014 became the immediate parent company of Santander UK plc and its controlled entities. From this date, the Company became the head of the Santander UK group for regulatory capital and leverage purposes.

As a significant wholly-owned subsidiary of Banco Santander, S.A., under CRD IV⁽¹⁾ Santander UK Group Holdings plc is only required to produce and publish a specified set of Pillar 3 elements, rather than a complete set of Pillar 3 disclosures. However the additional capital and risk management disclosures set out in this document align to the European Banking Authority (EBA) templates based on the Basel Committee Phase 1 Pillar 3 requirements (published on 14th December 2016).

CRD IV disclosures

This document contains disclosures required under CRD IV and the EBA for Santander UK as a significant subsidiary of an EU Banking Group, some of which are not disclosed in the Annual Report. All disclosures cover the 31 December 2018 position or movement during 2018.

Summary

Total exposure by risk type December 2018

Total exposures by class December 2018

Capital Base £millions

Capital Ratios %

(1) The Capital Requirements Directive IV (CRD IV) and Capital Requirements Regulation (CRR) legislative package, collectively referred to as CRD IV

(2) The reduction in CET1 capital amount between June 2018 and December 2018 is principally driven by the payment of a one-off dividend to our parent Banco Santander SA to compensate for asset transfers related to Banking Reform restructuring

Key metrics

The following table summarises the Company's Own Funds and key risk-based capital ratios at 31 December 2018 and 31 December 2017 together with the previously disclosed quarter end information at 30 September 2018, 30 June 2018 and 31 March 2018. Further detail on Risk Weighted Assets is included in the subsequent sections of this document.

Liquidity coverage ratio (LCR)	163.6%	145.9%	137.9%	132.0%	120.0%

Key Movements

The CET1 capital ratio increased 100 bps to 13.2%, largely driven by RWA reductions of £8.2bn. The RWA decrease is mainly due to ring-fence transfers, risk management initiatives and the widening of scope of our large corporate risk model earlier in the year. CET1 capital decreased during 2018 principally driven by the payment of a one-off dividend to our parent Banco Santander SA to compensate for asset transfers related to Banking Reform restructuring, offset by ongoing capital accretion through retained profits.

The LCR increased 44 percentage to 163.6% reflecting our decision to pre-fund some of our 2019 requirements.

¹ Fully loaded excludes the impact of transitional arrangements.

IFRS 9 Transitional Arrangements

The following table summarises the impact of IFRS 9 transitional arrangements on 31 December 2018 over the full allowable period.

Santander UK is applying the IFRS 9 capital transitional arrangements set out in EU Regulation 2017/2395 that amend the Capital Requirements Regulation, including the application of paragraph 4 of the revised article 473a. Under the transitional arrangements, Santander UK is entitled to mitigate the effect to capital of excepted credit loss-based provisioning following the implementation of IFRS 9. The transitional arrangements last for a five year period beginning on the 1st of January 2018 with the amount capital relief available reduced each year by the transitional factor. Set at 95 percent in 2018, the transitional factor declines to 85 percent in 2019, 70 percent in 2020, 50 percent in 2021 and 25 percent in 2022.

The capital relief affects both the capital base and RWAs reported by Santander UK. The adjustment to CET1 capital is comprised of a static element and a dynamic element. The static element is based on the CET1 capital impact of the change in provision levels upon implementation of IFRS 9 (on 1st January 2018). The capital adjustments from this static element will only change over five year transition period due to the phased reduction of the transitional factor. The dynamic element is based on the capital impact of the change in provision levels for non-credit impaired exposures from the first day of the implementation of IFRS 9. The dynamic element will change over the five year transition period and is also subject to progressive reduction over the 5 year transitional period due to the transitional factor. In addition to this adjustment, the transitional arrangements also reduce associated capital position impacts for exposures modelled under the Standardised Approach for Credit Risk, Deferred Tax assets created upon adoption of IFRS 9 ECL-based provisioning and Tier 2 capital from an excess of provisions over expected losses for exposures modelled using the Internal Rating Based approach.

Leverage ratio

The following table summarises the Company's end point CRD IV and UK Leverage ratio at 31 December 2018 and 31 December 2017 together with the previously disclosed quarter end information at 30 September 2018, 30 June 2018 and 31 March 2018. The UK Leverage ratio is consistent with the Leverage ratio applied to large UK banks under the framework defined by the Financial Policy Committee's review of the Leverage ratio.

	31 December 2018 £m	30 September 2018 £m	30 June 2018 £m	31 March 2018 £m	31 December 2017 £m
Common Equity Tier 1 (CET1) capital	10,401	10,327	10,818	10,681	10,620
End point Additional Tier 1 (AT1) capital	2,041	2,041	2,041	2,041	2,041
End point Tier 1 capital	12,442	12,368	12,859	12,722	12,661
Leverage Exposure CRD IV (£bn)	300.3	306.2	314.8	315.4	317.7
Leverage Exposure UK Leverage Ratio ¹ (£bn)	275.6	279.0	295.6	291.3	287.0
End point Tier 1 Leverage Ratio CRD IV	4.1%	4.0%	4.1%	4.0%	4.0%
End point Tier 1 Leverage Ratio UK Leverage Ratio ¹	4.5%	4.4%	4.4%	4.4%	4.4%
Average Tier 1 Leverage Ratio UK Leverage Ratio ¹	4.4%	4.3%	4.4%	4.3%	4.4%

The Leverage Ratio has remained relatively flat throughout 2018. Balance sheet movements impacting leverage exposures related to Banking Reform restructures were materially offset by a reduction in Common Equity Tier 1 capital due to the payment of a one-off dividend to our parent Banco Santander SA.

¹ Includes deductions permitted under the recommendation from the Financial Policy Committee on 25th July 2016.

Liquidity Coverage Ratio

Additional liquidity disclosures are published in the Annual Report. For further information please refer to the Liquidity Risk section of the Annual Report.

23	LIQUIDITY COVERAGE RATIO (%)	-	-	142.3%	134.0%
24	Number of data points used in calculation of averages	12	12	12	12

Key Movements

Throughout 2018 we maintained robust risk management controls to monitor and manage the levels of our eligible liquidity pool and encumbrance. The quarterly average weighted LCR increased to 142.3% at 31 December 2018, this increase reflected prudent planning and some pre-funding of our 2019 requirements.

Use of internal model-based approaches for determination of capital requirements

In accordance with CRD IV rules, and with approval of the Single Supervisory Mechanism (SSM) comprised of the European Central Bank (ECB) and national supervisory authorities of the participating countries, Santander UK uses internal models to calculate regulatory capital requirements for credit risk and market risk. Further details on the internal models used are included under credit risk and market risk in the risk types section of this document.

For credit risk three model-based approaches are used, which are collectively termed the Internal Ratings-Based (IRB) approach. The first of these approaches is the foundation IRB (FIRB) approach, under which a bank can calculate capital requirements using an internal assessment of the probability of default (PD) of a counterparty, combined with supervisory formula to estimate the exposure at default (EAD) and loss given default (LGD). The second approach is the advanced IRB (AIRB) approach (this includes the Retail IRB approach) under which a bank can calculate capital requirements using internal assessments for PD, EAD and LGD. The third approach is 'slotting', used for specialised lending exposures. For these types of exposures, a set of supervisory risk weights are used, which have to be assigned on the basis of a classification in five categories, depending on the underlying credit risk, as well as the remaining maturity.

Where these model-based approaches are not used, the standardised approach is used, under which a bank will apply a risk weighting to exposures depending on the category of exposure and, where available, an external credit rating.

The Santander UK scope of the use of IRB credit risk approaches and standardised approach is detailed in the table below:

	AIRB	FIRB	Slotting	Standardised
Retail	Residential mortgages Unsecured Personal Loans Bank Accounts	-	-	Credit Cards Consumer Finance Other
Non Retail	Banks Insurers Large Corporates Social Housing	Corporate	Specialised Lending	Sovereigns Other Non-IRB Corporates

For market risk, a combination of a Value at Risk (VaR) model and a Stressed VaR (SVaR) model are used to calculate capital requirements for risks within the trading book. For Santander UK, such models are used to calculate the capital requirements for certain risk factors as approved by the PRA with the remainder using the standardised approach.

Risk-weighted assets by business division

	Regulatory exposure			Risk-weighting			RWAs

- Market Risk ⁴	-	-	-	-	-	-	0.3	-	0.3
- Operational Risk	-	-	-	-	-	-	-	-	-
Other assets⁴	6.5	7.5	14.0	16.9%	58.7%	39.7%	1.1	4.4	5.5
Total	74.0	206.0	280.0	44.9%	22.1%	28.1%	33.2	45.6	78.8

(1) Market Risk RWAs are determined using both internal model-based and standardised approaches. See the Market Risk section of the Risk Review in the Santander UK plc Annual Report.

(2) Customer assets in the Corporate Centre largely comprise Social Housing.

(3) Eligible liquid assets include reverse repurchase agreements collateralised by eligible sovereign securities.

(4) The RWAs for other assets have been allocated to Corporate Centre. The RWAs cover Credit risk, Market risk and Operational risk.

Overview of RWA

The following table details RWA and equivalent Own Funds Requirements. Own Funds Requirements are calculated as RWA multiplied by 8%.

	RWA		Minimum capital requirements
	31 December 2018 £bn	30 September 2018 £bn	30 December 2018 ¹ £bn

Exposure value of relevant credit exposures defined in accordance with Article 140(4) of Directive 2013/36/EU.

Countries included in the table above were selected if total exposure was greater than £0.1bn pre-deductions based on Article 140(4) of Directive 2013/36/EU.

The following table shows the amount of institution-specific countercyclical capital buffer.

	£bn
Total risk exposure	78.8
Institution specific countercyclical capital buffer rate	1.0%
Institution specific countercyclical capital buffer requirement	0.8

The level of the Countercyclical Capital Buffer for Santander UK at 31 December 2018 was 0.96%.

Key features of credit risk models

The following table shows the key features of the Santander UK group's IRB models, outlining the model methodology or approach, the number of years of loss data used, the exposure class covered and applicable regulatory thresholds for each of the PD, LGD and EAD components¹. The RWAs as at 31 December 2018 are also shown. This table does not include portfolios covered by the IRB approach for securitisations (£0.6bn RWAs) and IRB approach for equity exposures (£0.4bn RWAs).

Component Modelled	Portfolio	Number of significant models and size of associated portfolio (RWAs)	Model Description and Methodology	Number of Years Loss Data	Exposure Classes Measured	Applicable Industry-wide regulatory thresholds
PD	Residential Mortgages	One Model (£25.8bn)	Statistical scorecard produces a PD that is scaled to a long-run cycle average	>10 years	Retail Mortgages	PD floor of 0.03%
	Unsecured Personal Loans	One Model (£1.9bn)	Statistical scorecard produces a PD that is scaled to a long-run average	c.3 years	Other Retail	PD floor of 0.03%
	Bank Accounts	One Model (£1.9bn)	Observed default rates segmented into statistical score bands, scaled to a long-run average	6-10 years	Qualifying Revolving Retail Exposures	PD floor of 0.03%
	Social Housing	One Model (£2.2bn)	Expert judgement rating model	Low default portfolio	Corporates	PD floor of 0.03%
	Corporate	Five Models (£7.8bn)	Statistical rating model for Corporates and slotting model (1) for Specialised Lending	>10 years	Corporates	PD floor of 0.03%
	Global Models	Three Models (£4.3bn)	Combination of statistical and expert judgement models for Banks, Insurers and Large Corporates	Low default portfolios	Corporates & Institutions	PD floor of 0.03%
LGD	Residential Mortgages	One Model (£25.8bn)	Data driven estimates of loss and propensity to write-off, stressed to a downturn position	3-5 years	Retail Mortgages	LGD floor of 10% at a portfolio level
	Unsecured Personal Loans	One Model (£1.9bn)	Regression based estimates of loss and propensity to write-off, with expert judgement where appropriate	c.3 years	Other Retail	NA
	Bank Accounts	One Model (£1.9bn)	Data driven estimates of loss and propensity to write-off, using a long run average	3-5 years	Qualifying Revolving Retail Exposures	NA
	Social Housing	One Model (£2.2bn)	Data driven estimate of realisable value of collateral	Low default portfolio	Corporates	LGD Floor of 35%
	Corporate	Five Models (£7.8bn)	Foundation IRB	NA	Corporates	NA
	Global Models	Three Models (£4.3bn)	Combination of statistical and expert judgement models for Banks, Insurers and Large Corporates	Low default portfolios	Corporates & Institutions	NA
EAD	Residential Mortgages	One Model (£25.8bn)	Long-run credit conversion factors applied to on and off balance	6-10 years	Retail Mortgages	EAD must be at least equivalent to current balance utilisation at account level
	Unsecured Personal Loans	One Model (£1.9bn)	Regression based model	c.3 years	Other Retail	EAD must be at least equivalent to current balance utilisation at account level
	Bank Accounts	One Model (£1.9bn)	Long-run credit conversion factors applied to on and off balance	6-10 years	Qualifying Revolving Retail Exposures	EAD must be at least equivalent to current balance utilisation at account level
	Social Housing	One Model (£2.2bn)	Data driven estimate	Low default portfolio	Corporates	EAD must be at least equivalent to current balance utilisation at account level
	Corporate	Five Models (£7.8bn)	Foundation IRB	NA	Corporates	EAD must be at least equivalent to current balance utilisation at account level
	Global Models	Three Models (£4.3bn)	Combination of statistical and expert judgement models for Banks, Insurers and Large Corporates	Low default portfolios	Corporates & Institutions	EAD must be at least equivalent to current balance utilisation at account level

¹ Slotting models do not estimate a PD or LGD, but do generate an Expected Loss

Probability of Default disclosures

The following tables show the distribution by credit quality of the value of exposures, credit risk parameters and capital for the Santander UK group's IRB portfolios, by exposure class. This excludes specialised lending and securitisation portfolios where PD is not estimated for RWA calculations. The initial table below details the relationship between the IRB model portfolio and exposure class.

IRB Model Portfolio	Exposure class
Residential Mortgages	Retail Mortgages
Unsecured Personal Loans	Other Retail
Bank Accounts	Qualifying Revolving Retail Exposures
Social Housing	Corporates
Corporate	Corporates
Global Models – Banks	Institutions
Global Models – Insurers	Corporates
Global Models – Large Corporates	Corporates

Santander UK uses a single rating scale to provide a consistent approach for reporting default risk across all the credit risk portfolios. The scale is comprised of eight grades for non-defaulted exposures numbered from 9 (lowest risk) to 2 (highest risk). In the tables below, the PD bands and associated PD ranges reflect those used for PRA reporting purposes. The PD band numbering is inverted, with 1 representing the lowest risk, and the definition of default is in accordance with PRA rules.

For the corporates and institutions exposure classes, the PD bands for an individual counterparty exposure are determined by the through-the-cycle PD value assigned to the counterparty exposures. This through-the-cycle PD is also used in the calculation of average PD, RWAs and average risk weighting for these classes. For the retail mortgages, qualifying revolving retail exposures and other retail exposure classes, the PD band and PD range reflect the point-in-time PD of an individual counterparty exposure, but the PD used for average PD, RWAs and average risk weighting is cycle-adjusted and hence can be different to the point-in-time PD. This results in the average PD being outside the specified PD range for some PD bands.

For all exposure classes, the average PD and average LGD reflect exposure at default-weighted values. The analysis for corporates and institutions includes both banking book exposures and counterparty risk exposures.

At 31 December 2018

Significant IRB models and model performance

The residential mortgage portfolio comprised £165.6bn of balance sheet EAD at 31 December 2018 and represented 80.4% of all retail IRB EAD, therefore the IRB models employed to calculate RWAs for this portfolio are considered the most significant. PD is determined by the new business application score and a bespoke default-risk scorecard for the back-book. These models produce account level, point-in-time PD estimates which are adjusted to a long-run average default rate using a variable scalar methodology employing observed and inferred default rate data back to 1989. Within each of the legacy portfolios (the former Abbey and Alliance & Leicester businesses) the scaling of the PD (grouped into 14 non-default risk grades) is performed separately across 13 risk segments determined by balance-to-value and buyer type.

LGD for residential mortgages is calculated as the proportion of the EAD expected to be written-off multiplied by the probability of a write-off occurring after a default event. The loss proportion uses a 'workout' approach, that is one minus the expected recovery proportion, plus direct and indirect recovery costs associated with the recovery process. The probability of write-off given default is measured from observed loss rates from quarterly tranches of accounts entering default since 2007. Downturn LGD is determined by stressing the model inputs to values observed during the worst points of the last recession. For example the forced sale discount is increased from 19% in normal times to a downturn value of 27%. The downturn probability of write-off given default uses the highest observed values, typically seen from in-defaults occurring during 2008. Other parameters such as time from default to sale, balance owing at sale and property value are also adjusted to be applicable for downturn conditions.

For Santander UK's foundation IRB models employed in Commercial Banking, PD is determined via a calibration of the rating model outputs to observed defaults.

The performance of all Santander UK's IRB models is monitored each quarter in accordance with Santander UK's model monitoring policies. The monitoring assesses the performance of the rating system with respect to the accuracy of the calibration, discrimination and stability of the component models. The retail models produce both point-in-time and regulatory values of PD, LGD and EAD. Actual values for these parameters are compared with:

- The point-in-time estimates to ensure the models remain accurate; and
- The regulatory values to ensure the margin of conservatism in regulatory capital.

The model monitoring analyses the causes of significant variance between actual and predicted parameters and identifies actions required to remediate. The monitoring and actions taken to correct under-performance are reviewed in accordance with Santander UK's internal model governance. Should the monitoring indicate that a model is underestimating risk, a temporary capital charge is raised by management until the cause is resolved.

The table below compares the IRB model expected loss with the amount of impairment allowances calculated under the IFRS rules and the impairment charge. The amount of expected loss not covered by impairment allowances contributes to deductions from regulatory capital.

	Expected Loss		Impairment	
	31 December 2017 £bn	31 December 2018 £bn	Allowances at 31 December 2018 £bn	Charge for 2018 £bn
Residential Mortgages	0.7	0.7	0.2	-
Unsecured Personal Loans	0.1	0.1	0.1	0.1
Bank Accounts	0.1	0.1	-	-
Social Housing	-	-	-	-
Corporate	0.2	0.2	0.1	0.1
Global Models	-	-	-	-
Total	1.1	1.1	0.4	0.2

Differences in the value of EL and provisions arise from differences in the way the two measures are calculated under the regulatory capital and accounting rules. These include, but are not limited to:

- Differences in the definition of default and impairment used for EL and provisions, respectively;
- Regulatory floors and economic cycle adjustments applied to PD and LGD values used in EL;
- Provisions recognise forward-looking losses for 12-months and lifetime period while EL is a forward-looking measure of loss arising from defaults in the 12 months; and
- Differences in the cost of recovery and discount rates applied to EL and provisions.

The IRB model expected loss is not regarded as an indicator of expected losses in accordance with accounting standards due to the level of regulatory floors and prudence built into the IRB models.

Market risk

Movements in RWAs during 2018 were as follows:

Market risk	2018 £bn
RWAs at 1 January	3.6
Movement in risk levels ¹	(2.6)
Model updates ²	-
Methodology and policy ³	-
RWAs at 31 December	1.0

(1) Changes in risk due to position changes and market movements.

(2) Updates to the model to reflect recent experience, change in model scope.

(3) Methodology changes to the calculations driven by regulatory policy changes.

The 31 December 2018 RWAs of £1.0bn were composed of £0.6bn using the internal model-based approach and £0.4bn using the standardised approach.

Key features of market risk models

The following table shows the key features of the Santander UK group's market risk internal models used for the assessment of RWAs, outlining the model methodology or approach, the number of years of market data used and applicable regulatory thresholds.

Component modelled	Number of significant models	Model Description and methodology	Number of years market data	Applicable regulatory thresholds for the industry
VaR	1 model	Historical simulation method with two-years of daily price history, equally weighted.	2 years	Regulatory VaR is calculated using 10 day holding period and 99% confidence interval.
SVaR	1 model	Same methodology as above except uses 1 year's daily price history.	1 year period of significant stress relevant to the banks' portfolio, reviewed quarterly	Regulatory SVaR is calculated using 10 day holding period and 99% confidence interval

Model update

Post Banking Reform restructuring Santander UK Group trading activity has significantly reduced. All market risk for new trades is calculated under the standardised approach. The market risk generated from the internal model-based approach (£0.6bn) relates to legacy activity.

Operational risk

Santander UK calculates its operational risk capital requirement under the standardised approach in accordance with PRA rules. The standardised approach uses the average of three years' income of each business line. The average three year income is adjusted to take into account historical income of any businesses acquired during that period. The increase of RWAs in 2018 of £40m was a result of a higher average three year income.

Credit risk adjustments

The following table outlines the credit risk exposure, the associated level of impaired and past due exposures levels and impairment levels (credit risk adjustments) for 2018 by class of exposure. Further information on impairment losses and provisions is outlined in Notes 8 and 14 to the financial statements in the 2018 Santander UK Group Holdings plc Annual Report.

Definitions of past due and impaired and the approaches and methods adopted for specific credit risk are included in Note 1 to the financial statements in the Santander UK Group Holdings plc Annual Report.

Credit quality of exposures by industry

Breakdown of exposures by industry class and Credit Quality.

As at 31 December 2018	Gross carrying values of					Net value
	Defaulted Exposure	Non-Defaulted Exposure	Specific Credit Risk Adjustments	Accumulated write-offs	Credit risk adjustment charges during the period

Other	4	2,647	(8)	-	7	2,643
Total	2,407	288,780	(807)	(534)	133	290,380

For geographical areas of past due and impaired exposures, over 99% are to the UK.

Credit Risk Mitigation Techniques

For more detail on the Company's approach to Credit Risk Mitigation refer to the Other Segments – Credit Risk Management section of the Annual Report.

The following table provides analysis of secured and collateralised exposures as at 31 December 2018.

	Exposures unsecured – Carrying amount	Exposures secured – Carrying amount	Exposures secured by collateral	Exposures secured by financial guarantees	Exposures secured by credit derivatives
	31 December 2018 £bn	31 December 2018 £bn	31 December 2018 £bn	31 December 2018 £bn	31 December 2018 £bn
Total loans	90,038	181,271	13,666	5,405	-
Total debt securities ¹	12,657	-	7,873	-	-
Total exposures	102,695	181,271	21,539	5,405	-
Of which defaulted	479	1,928	-	-	-

Changes in the stock of specific credit risk adjustments

Movement over the period 1 January 2018 to 31 December 2018 of specific credit risk adjustments.²

	Accumulated specific credit risk adjustment £m
Opening balance (IFRS9)	1,151
Increases due to origination and acquisition during the period	68
Decreases due to derecognition during the period	(41)
Changes due to change in credit risk (net)	209
Changes due to modifications without derecognition (net)	(4)
Changes due to update in the institution's methodology for estimation (net)	-
Other adjustments	(34)
Decrease in allowance account due to write-offs	(542)
Closing balance	807
Recoveries on credit risk adjustments recorded directly to the statement of profit or loss	80
Specific credit risk adjustments directly recorded to the statement of profit or loss	-

Changes in the stock of defaulted and impaired loans and debt securities

Movement over the period 1 January 2018 to 31 December 2018 of carrying value of defaulted exposures.

	Gross carrying value of defaulted exposures £m
Opening balance (IFRS9)	3,043
Loans and debt securities that have defaulted or impaired since the last reporting period	1,048
Returned to non-defaulted status	(1,066)
Amounts written off	(656)
Other changes ³	202
Closing balance	2,571

¹ Per note 20 Financial Investments in the Annual Report, excluding debt securities

² Table has been revised from the version in the EBA "Final Report on the guidelines on disclosure requirements under part eight of regulation (EU) NO 575/2013" to reflect FINREP update due to the adoption of IFRS 9

³ Includes residual movement on facilities that did not change stage in the year, and which were neither acquired nor purchased in the year

Credit risk exposure

Breakdown of loans and advances to banks and customers and central bank exposures by credit quality, including total and average net amount of exposures (excludes securitisations and other debt instruments).

Gross carrying values of								
As at 31 December 2018	Defaulted Exposure	Non-Defaulted Exposure	Net value of exposures at the end of the period	Average net exposures over the period	Specific Credit Risk Adjustments	Accumulated write-offs	Credit risk adjustment charges during the period	Net value

Unearned credit spreads	-	-	-	2.7	-	2.7	2.7	-
Future administrative costs	0.1	-	-	-	-	0.1	-	0.1
Other	10.6	6.7	-	10.4	-	27.7	0.7	27.0
Total adjustment	11.5	13.1	-	17.6	-	42.2	5.9	36.3

Key Movements

The PVA decreased by £28m during 2018 as a direct consequence of risk reduction due to Banking Reform.

Remuneration

Per the Basel Committee on Banking Supervision's Pillar 3 disclosure requirements – consolidated and enhanced framework directive, Santander UK Group Holdings plc is fulfilling its obligation to disclose remuneration notes in the Directors' Remuneration Report section of the Annual Report.

CRR Leverage ratio – disclosure template

The table below provides a reconciliation of accounting assets to the CRD IV Leverage ratio exposure, and information on the composition of the principal exposure elements as at 31 December 2018. A CRD IV end point Tier 1 capital measure is used for this disclosure and Leverage Ratio calculation, consistent with the UK framework for large banks.

Summary reconciliation of accounting assets and Leverage Ratio exposures

	£bn
1 Total assets as per published financial statements	289,383
2 Adjustment for entities which are consolidated for accounting purposes but are outside the scope of regulatory consolidation	797
3 (Adjustment for fiduciary assets recognised on the balance sheet pursuant to the applicable accounting framework but excluded from the Leverage Ratio exposure measure in accordance with Article 429(13) of Regulation (EU) No 575/2013 CRR)	(3,066)
4 Adjustments for derivative financial instruments	(2,349)
5 Adjustments for securities financing transactions (SFTs)	812
6 Adjustment for off-balance sheet items (i.e. conversion to credit equivalent amounts of off-balance sheet exposures)	13,414
EU-6a (Adjustment for intragroup exposures excluded from the Leverage Ratio exposure measure in accordance with Article 429 (7) of Regulation (EU) No 575/2013)	-
EU-6b (Adjustment for exposures excluded from the Leverage Ratio exposure measure in accordance with Article 429 (14) of Regulation (EU) No 575/2013)	-
7 Other adjustments	1,337
8 Total Leverage Ratio exposure	300,328

Leverage Ratio common disclosure

	Exposure £bn
On-balance sheet exposures (excluding derivatives and SFTs)	
1 On-balance sheet items (excluding derivatives, SFTs and fiduciary assets, but including collateral)	260,664
2 (Asset amounts deducted in determining Tier 1 capital)	(3,066)
3 Total on-balance sheet exposures (excluding derivatives, SFTs and fiduciary assets) (sum of lines 1 and 2)	257,598
Derivative exposures	
4 Replacement cost associated with all derivatives transactions (i.e. net of eligible cash variation margin)	4,388
5 Add-on amounts for PFE associated with all derivatives transactions (mark-to-market method)	2,194
EU-5a Exposure determined under Original Exposure Method	-
6 Gross-up for derivatives collateral provided where deducted from the balance sheet assets pursuant to the applicable accounting framework	-
7 (Deductions of receivables assets for cash variation margin provided in derivatives transactions)	(3,611)
8 (Exempted CCP leg of client-cleared trade exposures)	-
9 Adjusted effective notional amount of written credit derivatives	-
10 (Adjusted effective notional offsets and add-on deductions for written credit derivatives)	-
11 Total derivative exposures (sum of lines 4 to 10)	2,971
Securities financing transaction exposures	
12 Gross SFT assets (with no recognition of netting), after adjusting for sales accounting transactions	27,005
13 (Netted amounts of cash payables and cash receivables of gross SFT assets)	(3,606)
14 Counterparty credit risk exposure for SFT assets	812
EU-14a Derogation for SFTs: Counterparty credit risk exposure in accordance with Article 429b (4) and 222 of Regulation (EU) No 575/2013	-
15 Agent transaction exposures	-
EU-15a (Exempted CCP leg of client-cleared SFT exposure)	-
16 Total securities financing transaction exposures (sum of lines 12 to 15a)	24,211
Other off-balance sheet exposures	
17 Off-balance sheet exposures at gross notional amount	41,711
18 (Adjustments for conversion to credit equivalent amounts)	(28,297)
19 Other off-balance sheet exposures (sum of lines 17 to 18)	13,414
Exempted exposures in accordance with CRR Article 429 (7) and (14) (on and off balance sheet)	
(Exemption of intragroup exposures (solo basis) in accordance with Article 429(7) of Regulation (EU) No 575/2013 (on and off balance sheet))	797
EU-19a	
EU-19b (Exposures exempted in accordance with Article 429 (14) of Regulation (EU) No 575/2013 (on and off balance sheet))	
Capital and total exposures	1,337
20 Tier 1 capital (CRD IV end point)	12,442
21 Total Leverage Ratio exposures (sum of lines 3, 11, 16, 19, EU-19a and EU-19b)	
Leverage Ratio	300,328
22 Leverage Ratio	4.1%
Choice on transitional arrangements and amount of derecognised fiduciary items	
EU-23 Choice on transitional arrangements for the definition of the capital measure	-
EU-24 Amount of derecognised fiduciary items in accordance with Article 429(11) of Regulation (EU) NO 575/2013	-

Own Funds disclosure – balance sheet reconciliation

The scope of consolidation and method for consolidation of the Santander UK Group Holdings plc balance sheet is substantially the same as that used for regulatory purposes.

A reconciliation of regulatory own funds to the relevant balance sheet items for Santander UK Group Holdings plc is included in the table below as at 31 December 2018. This outlines the impact of the difference in scope of consolidation outlined above.

	Own Funds Type		
	CET1 £m	Additional Tier 1 £m	Tier 2 £m
Santander UK Balance Sheet elements			
Shareholder's equity and Non-controlling interests	13,930	2,290	-
Subordinated Liabilities	-	344	3,257
CRD IV Adjustments			
Additional value adjustments	(42)	-	-
Intangible Assets (net of related tax liability)	(1,771)	-	-
Fair value reserves related to gains or losses on cash flow hedges	(251)	-	-
Negative amounts resulting from the calculation of regulatory expected loss amounts	(599)	-	-
Gains or losses on liabilities valued at fair value resulting from changes in own credit standing	(67)	-	-
Deferred tax assets arising from temporary differences	(20)	-	-
Defined benefit pension fund assets	(631)	-	-
- Dividend accrual	(18)	-	-
- Deduction for minority interests	(151)	-	-
- IFRS 9 Transitional Adjustments	21	-	-
Amount excluded from Tier 2 due to transitional recognition cap	-	(268)	(986)
Total	10,401	2,366	2,271

Own Funds disclosure – Transitional Own Funds disclosure template

The following table provides disclosure of Santander UK Group Holdings plc's own funds items. The CRD IV end point position can be derived as the sum of the 31 December 2018 result and the associated end point adjustment. The Common Equity Tier 1 (CET1) Capital before regulatory adjustments below differs from other disclosures in this document as this template requires an alternative treatment of CET1 Minority Interests and foreseeable dividends.

	31 December 2018 £m	CRD IV end point adjustments £m
Common Equity Tier 1 (CET1) Capital: instruments and reserves		
1 Capital Instruments and the related share premium accounts	7,060	-
2 Retained Earnings	6,421	-
3 Accumulated other comprehensive income (and other reserves)	280	-
4 Amount of qualifying items referred to in Article 484 (3) and the related share premium account subject to phase out from CET1	-	-
5 Minority interests (amount allowed in consolidated CET1)	-	-
5a Independently reviewed interim profits net of any foreseeable charge or dividend	-	-
6 Common Equity Tier 1 (CET1) capital before regulatory adjustments	13,761	-
Common Equity Tier 1 (CET1) Capital: regulatory adjustments		
7 Additional value adjustments (negative amount)	(42)	-
8 Intangible assets (net of related tax liability) (negative amount)	(1,771)	-
10 Deferred tax assets that rely on future profitability excluding those arising from temporary differences (net of related tax liability where the conditions in Article 38 (3) are met) (negative amount)	-	-
11 Fair value reserves related to gains or losses on cash flow hedges	(251)	-
12 Negative amounts resulting from the calculation of expected loss amounts	(599)	-
13 Any increase in equity that results from securitised assets (negative amount)	-	-
14 Gains of losses on liabilities valued at fair value resulting from changes in own credit standing	(67)	-
15 Defined-benefit pension fund assets (negative amount)	(631)	-
16 Direct and indirect holdings by an institution of own CET1 instruments (negative amount)	-	-
17 Direct, indirect and synthetic holdings of the CET1 instruments of financial sector entities where those entities have reciprocal cross holdings with the institution designed to inflate artificially the own funds of the institution (negative amount)	-	-
18 Direct, indirect and synthetic holdings by the institution of the CET1 instruments of financial sector entities where the institution does not have a significant investment in those entities (amount above 10% threshold and net of eligible short positions) (negative amount)	-	-
19 Direct, indirect and synthetic holdings by the institution of the CET1 instruments of financial sector entities where the institution has a significant investment in those entities (amount above 10% threshold and net of eligible short positions) (negative amount)	-	-
20a Exposure amount of the following items which qualify for a RW of 1250%, where the institution opts for the deduction alternative	-	-
20b of which: qualifying holdings outside the financial sector (negative amount)	-	-
20c of which: securitisation positions (negative amount)	-	-
20d of which: free deliveries (negative amount)	-	-
21 Deferred tax assets arising from temporary differences (amount above 10% threshold, net of related tax liability where the conditions in Article 38 (3) are met) (negative amount)	(20)	-
22 Amount exceeding the 15% threshold (negative amount)	-	-
23 of which: direct and indirect holdings by the institution of the CET1 instruments of financial sector entities where the institution has a significant investment in those entities	-	-
25 of which: deferred tax assets arising from temporary differences	-	-
25a Losses for the current financial year (negative amount)	-	-
25b Foreseeable tax charges relating to CET1 items (negative amount)	-	-
26 Regulatory adjustment applied to Common Equity Tier 1 in respect of amounts subject to pre-CRR treatment and IFRS 9 Transitional	21	-
26a Regulatory adjustments relating to unrealised gains and losses pursuant to Articles 467 and 468	-	-
26b Amount to be deducted from or added to Common Equity Tier 1 capital with regard to additional filters and deductions required pre CRR	-	-
27 Qualifying AT1 deductions that exceed the AT1 capital of the institution (negative amount)	-	-
28 Total regulatory adjustments to Common Equity Tier 1 (CET1)	(3,360)	-
29 Common Equity Tier 1 (CET1) capital	10,401	-
30 Capital instruments and the related share premium accounts	2,041	-
31 of which: classified as equity under applicable accounting standards	2,041	-
32 of which: classified as liabilities under applicable accounting standards	-	-
33 Amount of qualifying items referred to in Article 484 (4) and the related share premium accounts subject to phase out from AT1	-	-
34 Qualifying Tier 1 capital included in consolidated AT1 capital (including minority interests not included in row 5) issued by subsidiaries and held by third parties	325	(325)
35 of which: instruments issued by subsidiaries subject to phase out	325	(325)
36 Additional Tier 1 (AT1) capital before regulatory adjustments	2,366	(325)
Additional Tier 1 (AT1) capital: regulatory adjustments		
37 Direct and indirect holdings by an institution of own AT1 instruments (negative amount)	-	-
38 Holdings of the AT1 instruments of financial sector entities where those entities have reciprocal cross holdings with the institution designed to inflate artificially the own funds of the institution (negative amount)	-	-
39 Direct, indirect and synthetic holdings of the AT1 instruments of financial sector entities where the institution does not have a significant investment in those entities (amount above 10% threshold and net of eligible short positions) (negative amount)	-	-
40 Direct, indirect and synthetic holdings by the institution of the AT1 instruments of financial sector entities where the institution has a significant investment in those entities (amount above the 10% threshold net of eligible short positions) (negative amount)	-	-
41 Regulatory adjustments applied to additional tier 1 in respect of amounts subject to pre-CRR treatment and transitional treatments subject to phase out as prescribed in Regulation (EU) No 575/2013 (i.e. CRR residual amounts)	-	-
41a Residual amounts deducted from Additional Tier 1 capital with regard to deduction from Common Equity Tier 1 capital during	-	-

	31 December 2018 £m	CRD IV end point adjustments £m
the transition period pursuant to article 472 of Regulation (EU) No 575/2013		
41b	Residual amounts deducted from Additional Tier 1 capital with regard to deduction from Tier 2 capital during the transitional period pursuant to article of Regulation (EU) No 575/2013	-

44	Additional Tier 1 (AT1) capital	2,366 (325)
45	Tier 1 capital (T1 = CET1 + AT1)	12,767 (325)
Tier 2 (T2) capital: instruments and provisions		
46	Capital instruments and the related share premium accounts	1,186 -
47	Amount of qualifying items referred to in Article 484 (5) and the related share premium accounts subject to phase out from T2	- -
48	Qualifying own funds instruments included in consolidated T2 capital (including minority interests and AT1 instruments not included in row 5 or 34) issued by subsidiaries and held by third parties	1,085 44
49	of which: instruments issued by subsidiaries subject to phase out	196 (196)
50	Credit risk adjustments	- -
51	Tier 2 (T2) capital before regulatory adjustments	2,271 44
Tier 2 (T2) capital: regulatory adjustments		
52	Direct and indirect holdings by an institution of own T2 instruments and subordinated loans (negative amount)	- -
53	Holdings of the T2 instruments and subordinated loans of financial sector entities where those entities have reciprocal cross holdings with the institution designed to inflate artificially the own funds of the institution (negative amount)	- -
54	Direct and indirect holdings of the T2 instruments and subordinated loans of financial sector entities where the institution does not have a significant investment in those entities (amount above 10% threshold and net of eligible short positions) (negative amount)	- -
54a	Of which new holdings not subject to transitional arrangements	- -
54b	Of which holdings existing before 1 January 2013 and subject to transitional arrangements	- -
55	Direct and indirect holdings by the institution of the T2 instruments and subordinated loans of financial sector entities where the institution has a significant investment in those entities (net of eligible short positions) (negative amount)	- -
56	Regulatory adjustments applied to tier 2 in respect of amounts subject to pre-CRR treatment and transitional treatments subject to phase out as prescribed in Regulation (EU) 575/2013 (i.e. CRR residual amounts)	- -
56a	Residual amounts deducted from Tier 2 capital with regard to deduction from Common Equity Tier 1 capital during the transitional period pursuant to article 472 of Regulation (EU) No 575/2013	- -
56b	Residual amounts deducted from Tier 2 capital with regard to deduction from Additional Tier 1 capital during the transitional period pursuant to article 475 of Regulation (EU) No 575/2013	- -
56c	Amounts to be deducted from or added to Tier 2 capital with regard to additional filters and deductions required pre CRR	- -
57	Total regulatory adjustments to Tier 2 (T2) capital	- -
58	Tier 2 (T2) capital	2,271 -
59	Total Capital (TC = T1 + T2)	15,038 -
59a	Risk weighted assets in respect of amounts subject to pre CRR treatment and transitional treatments subject to phase out as prescribed in Regulation (EU) 575/2013 (i.e. CRR residual amounts)	- -
60	Total risk weighted assets	78,780
Capital ratio and buffers		
61	Common Equity Tier (as a percentage of total risk exposure amount)	13.2% -
62	Tier 1 (as a percentage of total risk exposure amount)	16.2% -
63	Total capital (as a percentage of total risk exposure amount)	19.1% -
64	Institution specific buffer requirement (CET 1 requirement in accordance with article 92 (1) (a) plus capital conservation and countercyclical buffer requirements, plus systemic risk buffer, plus systemically important institution buffer expressed as a percentage of risk exposure amount)	2.84% -
65	of which: capital conservation buffer requirement	1.88% -
66	of which: countercyclical buffer requirement	0.96% -
67	of which: systemic risk buffer requirement	- -
67a	of which: Global Systemically Important Institution (G-SII) or Other Systemically Important Institution (O-SII) buffer	- -
68	Common Equity Tier 1 available to meet buffers (as a percentage of risk exposure amount)	13.2% -
Amounts below the threshold for deduction (before risk weighting)		
72	Direct and indirect holdings of the capital of financial sector entities where the institution does not have a significant investment in those entities (amount below 10% threshold and net of eligible short positions)	1 -
73	Direct and indirect holdings by the institutions of the CET1 instruments of financial sector entities where the institution has a significant in those entities (amount below 10% threshold and net of eligible short positions)	- -
75	Deferred tax assets arising from temporary differences (amount below 10% threshold, net of related tax liability where the conditions in Article 38 (3) are met)	- -
Applicable caps on the inclusion of provisions in Tier 2		
76	Credit risk adjustments included in T2 in respect of exposures subject to standardised approach (prior to the application of the cap)	- -
77	Cap on inclusion if credit risk adjustment in T2 under standardised approach	303 -
78	Credit risk adjustments included in T2 in respect of exposures subject to internal ratings-based approach (prior to the application of the cap)	- -
79	Cap for inclusion of credit risk adjustment in T2 under internal ratings-based approach	269 -
Capital instruments subject to phase-out arrangements (only applicable between 1 Jan 2014 and 1 Jan 2022)		
80	Current cap on CET1 instruments subject to phase out arrangements	- -
81	Amount excluded from CET1 due to cap (excess over cap after redemptions and maturities)	- -
82	Current cap on AT1 instruments subject to phase out arrangements	- -
83	Amount excluded from AT1 due to cap (excess over cap after redemptions and maturities)	- -
84	Current cap on T2 instruments subject to phase out arrangements	- -
85	Amount excluded from T2 due to cap (excess over cap after redemptions and maturities)	- -

Own Funds disclosure – capital instruments main features

The following table outlines the main features of Santander UK's Common Equity Tier 1, Additional Tier 1 and Tier 2 instruments. Further details are included in the 2018 Santander UK Group Holdings plc Annual Report in Notes 29 and 34 to the financial statements.

1	Issuer	Santander UK plc	Santander UK plc	Santander UK plc	Santander UK plc	Santander UK plc	Santander UK plc	Santander UK Group Holdings plc	Santander UK plc

Glossary

Advanced Internal Ratings Based Approach (AIRB)	A method of calculation using internal estimates for all risk components.
Basel III	In December 2010, the Basel Committee on Banking Supervision issued the Basel III rules text, which presents the details of strengthened global regulatory standards on bank capital adequacy and liquidity. The standards were implemented in the EU in January 2014.
Capital Conservation Buffer	A capital buffer required under Basel III to ensure banks build up capital buffers outside of periods of stress.
Common Equity Tier 1 (CET1) capital	The called-up share capital and eligible reserves less deductions calculated in accordance with the CRD IV implementation rules as per the PRA Policy Statement PS7/13. CET1 capital ratio is CET1 capital as a percentage of risk-weighted assets.
Common Equity Tier 1 ratio	CET1 capital as a percentage of risk-weighted assets.
Countercyclical capital buffer (CCyB)	A capital buffer required under Basel III to ensure that capital requirements take account of the macro-financial environment in which banks operate.
Counterparty credit risk	A subset of credit risk and is the risk that a counterparty defaults.
CRD IV	An EU legislative package covering prudential rules for banks, building societies and investment firms.
Credit Conversion Factor (CCF)	An estimate of the amount Santander expects a customer to have drawn further on a facility limit at the point of default.
Credit Risk	The risk that a counterparty will default and will be unable to fulfil the obligations of their contract.
Credit Valuation Adjustment (CVA)	Adjustments to the fair values of derivative assets to reflect the creditworthiness of the counterparty.
Expected Loss (EL)	The Santander UK group measure of anticipated loss for exposures captured under an internal ratings-based credit risk approach for capital adequacy calculations. It is measured as the Santander UK group-modelled view of anticipated loss based on Probability of Default, Loss Given Default and Exposure at Default, with a one-year time horizon.
Exposure	The maximum loss that a financial institution might suffer if a borrower, counterparty or group fails to meet their obligations or assets and off-balance sheet positions have to be realised.
Exposure at Default (EAD)	The estimation of the extent to which the Santander UK group may be exposed to a customer or counterparty in the event of, and at the time of, that counterparty's default. At default, the customer may not have drawn the loan fully or may already have repaid some of the principal, so that exposure is typically less than the approved loan limit.
Fair Value	The value of an asset or liability when the transaction is on an arm's length basis.
Financial Policy Committee	An independent committee at the Bank of England with the objective of overseeing and taking action to remove or reduce systemic risks to protect and enhance the resilience of the UK financial system.
Foundation Internal Ratings Based Approach (FIRB)	A method of calculation for credit risk capital requirements using internal estimate of PD with supervisory estimates for LGD and supervisory calculations for EAD.
Global Systemically Important Bank (G-SIB)	G-SIBs are subject to higher capital buffer requirements, total loss-absorbing capacity requirements, resolvability requirements and higher supervisory expectations and have been phased in from 1 January 2016.
Institution	An investment firm or credit institution.
Internal Models Approach (IMA)	Approved by the PRA this model is used to calculate market risk capital and RWA.
Internal Ratings-Based Approach (IRB)	The Santander UK group's method, under the CRD IV framework, for calculating credit risk capital requirements using the Santander UK group's internal Probability of Default models but with supervisory estimates of Loss Given Default and conversion factors for the calculation of Exposure at Default.
Leverage Ratio	CRD IV end-point Tier 1 capital divided by exposures as defined by the European Commission Delegated Regulation 2015/62 of October 2014. In July 2016, the definition was amended to exclude from the calculation for total exposure those assets held against central banks that are matched by deposits in the same currency and of equal or longer maturity.
Loss Given Default (LGD)	The fraction of Exposure at Default that will not be recovered following default. LGD comprises the actual loss (the part that is not recovered), together with the economic costs associated with the recovery process.
Mark-to-Market Approach	An approach available to banks to calculate the exposure value associated with derivative transactions.
Market Risk	The risk of loss of earnings or economic value due to adverse changes in the financial market.
Maturity or Residual Maturity (for RWAs)	Remaining time until a transaction expires.
Minimum Capital Requirement	Minimum capital required for credit, market and operational risk.
Multilateral Development Banks	An institution created by a group of countries to provide financing for the purpose of development.
Operational Risk	The risk of loss due to the failure of people, process or technology.
Pillar 1	The first pillar of the Basel III approach which provides the approach to the calculation of the minimum capital requirements. This is 8% of the banks risk-weighted assets.
Pillar 3	The part of the CRD IV Accord which sets out the disclosure requirements for firms to publish details of their risks, capital and risk management. The aims are greater transparency and strengthening market discipline.
Probability of Default (PD)	The degree of likelihood that the counterparty fails to meet their financial obligation, within a period of one year.
Prudential Regulation Authority (PRA)	The UK financial services regulator formed as one of the successors to the FSA. The PRA is part of the Bank of England and is responsible for the prudential regulation and supervision of banks, building societies, credit unions, insurers and major investment firms. It sets standards and supervises financial institutions at the level of the individual firm.
Prudential Valuation Adjustment (PVA)	These are adjustments to the tier 1 capital where the prudent value of the position in the trading book is seen by the bank as being below the fair value recognised in the financial statements.
Regulatory Capital	The amount of capital that the Santander UK group holds, determined in accordance with rules established by the UK PRA for the consolidated Santander UK group and by local regulators for individual Santander UK group companies.
Repurchase Agreement (repo)/Reverse Repurchase Agreement (reverse repo)	In a sale and repurchase agreement one party, the seller, sells a financial asset to another party, the buyer, under commitments to reacquire the asset at a later date. The buyer at the same time agrees to resell the asset at the same later date. From the seller's perspective such agreements are securities sold under repurchase agreements (repos) and from the buyer's securities purchased under commitments to resell (reverse repos).
Retail Internal Ratings Based Approach (Retail IRB)	The Santander UK group's internal method of calculating credit risk capital requirements for its key retail portfolios. The FSA approved the Santander UK group's application of the Retail IRB approach to the Santander UK group's credit portfolios with effect from 1 January 2008.
Risk-Weighted Assets (RWAs)	A measure of a bank's assets adjusted for their associated risks. Risk weightings are established in accordance with the Basel Capital Accord as implemented by the PRA.
RWA Density	The risk-weighted asset divided by exposure at default.
Securities Financing Transactions (SFT)	Transactions involving repurchase agreements and reverse repurchase agreements, stock borrow lending and other securities.
Securitisation Positions	The position assumed by the bank following the purchase of securities.
Specialised Lending	An exposure to an entity which was created specifically to finance and/or operate physical assets, where the contractual arrangements given the lender a substantial degree of control over the assets and the income that they generate and the primary source of repayment of the obligation is the income generated by the assets being financed.
Standardised Approach	In relation to credit risk, a method for calculating credit risk capital requirements under CRD IV, using External Credit Assessment Institutions ratings and supervisory risk weights. The Standardised approach is less risk-sensitive than IRB (see 'IRB' above). In relation to operational risk, a method of calculating the operational capital requirement under CRD IV, by the application of a supervisory defined percentage charge to the gross income of eight specified business lines.

Tier 1 Capital	A measure of a bank's financial strength defined by the PRA. It captures Core Tier 1 capital plus other Tier 1 securities in issue, but is subject to a deduction in respect of material holdings in financial companies.
Tier 1 Capital ratio	The ratio expresses Tier 1 capital as a percentage of risk weighted assets.
Tier 2 Capital	Defined by the PRA. Broadly, it includes qualifying subordinated debt and other Tier 2 securities in issue, eligible collective impairment allowances, unrealised available for sale equity gains and revaluation reserves. It is subject to deductions relating to the excess of expected loss over regulatory impairment allowance, securitisation positions and material holdings in financial companies.
Trading Book	Positions in financial instruments held either with trading intent or in order to hedge other elements of the trading book, which must be free of restrictive covenants on their tradability or ability to be hedged.
Value at Risk (VaR)	An estimate of the potential loss which might arise from market movements under normal market conditions, if the current positions were to be held unchanged for one business day, measured to a confidence level.
